

## MEG Demo (Staff App) - MEG Demo - MEG Staff app: TGA name change

The Therapeutic Goods Administration (TGA) is updating some medicine ingredient names used in Australia to align with names used internationally

What is happening?

- There will be a four-year transition period starting in April 2016 and ending in April 2020.
- Medicines with labels using the new ingredient names will gradually start to appear on shelves (note: the medicine remains the same)

Not all medicine ingredient names are changing. A list of medicine ingredient names that will change is now available at the [TGA website](#)
